ACTA MECHANICA SOLIDA SINICA

LIST OF CONTENTS

1990

Cavity nucleation, growth and stress field in elastic–plastic medium
..... YU–GONG YE (1–1)

Analyses on micro–fracture of crack tip under large deformation conditions
..... KE–SHI ZHANG,SHI–HUI LI and CHANG–QING ZHENG (1–13)

On the local average of random field in stochastic finite element analysis
..... WEI–QIU ZHU and WEI–QIANG WU (1–27)

The near crack tip fields of stress and damage for concrete
..... ZHI–HE JIN and SHOU–WEN YU (1–43)

Effect of local surface and subsurface irregularities on the propagation of P, SV waves
..... XIAO–YING LI and ZHI–XIN XU (1–57)

A modal analysis for the dynamic response of fluid–structure systems
..... DA–NONG DAI, XU–CHENG WANG and QING–HUA DU (1–71)

Multiobjective fuzzy optimum design of antenna structures
..... SHU–XUN CHEN and GUANG–YUAN WANG (1–81)

Stress analysis in adhesive–bonded joints for orthotropic plates
..... TONG JIANG and SHUN CHENG (1–93)

2–D moire interferometry of sticking film and its application in the determination of mixed mode SIF
..... ZHI–SHAN LUO and GUI–QIN CHANG (1–103)

The BEM analysis on bending fracture problem of thin plate
..... ZENG–FU LI and GUI–CHANG YANG (1–113)

A boundary element method for calculating the SH waves scattering from arbitrarily shaped holes in an anisotropic medium
..... WEI–FANG ZHONG and WEI–PING QIAN (2–123)

A kinematic shakedown theorem considering external loading and temperature variation
..... SEN–TIAN DU and BING–YE XU (2–143)

A numerical method for three dimensional nonlinear finite elements with elastic boundary elements
..... XIAO–YAN LEI and QING–HUA DU (2–155)

Conditions for the existence of a complete set of real modes for a damping vibration system
..... MAN LIU (2–169)

A method of calculation of the optimal lectotype for complex structures
..... TIAN–XIA SONG (2–175)
Analysis of deformation of nozzleless rocket propellent
..... YA–PENG SHEN,ZHE ZHOU and XUE QI (2–193)
A study of finite element discretization technique in time domain
..... LI–MIN TANG,YING–XI LIU and ZHEN–FENG ZHAO (2–201)
Stochastic finite element analysis of local average random fields
..... QIU CHEN,XIAN–XING LI and ZHI–MING DAI (2–209)
New mixed plate–bending elements with shear strain interpolations
..... HAO–JIANG DING and YONG–JIAN REN (2–217)
Buckling analysis of laminated cylindrical shells by 3–D multilayer hybrid element
..... CHENG WANG and SU–SU WANG (2–229)
Generalized sub–region mixed and hybrid variational principles in nonlinear elastodynamics
..... ZHAO–CHANG ZHENG and JING–TANG XING (2–237)
Integral constitutive equations of elastic–plastic materials
..... ZHEN–BANG KUANG (3–245)
Analysis to the stress and strain structures of mode I 3–D crack in elastic–plastic state
..... XIAO–MING CHEN,NAN–SHENG YANG
and ZHONG–XIN GUAN (3–263)
A smeared / layered reinforced concrete mode for finite element analysis
..... YUANG–GAO ZHANG,MING–WAN LU
and KEH–CHIH HWANG (3–277)
A wet modal method for analyzing responses of cylindrical liquid container under ground motion
..... YU–YING HUANG (3–287)
A study of the hybrid element methods for stress analysis
..... WAN–JI CHEN (3–301)
The development of the dynamics of rigid body with state variables
..... YAN–ZHU LIU (3–307)
A comparative study on algorithms of boundary element solution for free torsional vibration of bodies of revolution
..... XIU–XI WANG,FENG CHEN and JIE WU (3–315)
Some applications of boundary element methods, boundary element–finite element coupling techniques in elasto–plastic stress analysis
..... QING–HUA DU and ZHEN–HAN YAO (3–327)
Establishing strain response model of vibrational structure by strain mode analysis approach
..... DE–BAO LI (3–341)

Elastic–plastic analysis of reissner–mindlin plates by the use of hybrid stress FEM with layered model

..... DAI–PENG CHEN,B.K.ZHOU and DE–YUAN ZUO (3–351)

Constitutive relations of damaged viscoelastic materials including chemical reaction

..... YIN–CHU LU and JIAN–PING ZHOU (4–361)

Experimental investigation on large deflection response of a frame impacted by a moving body

..... ZI–FENG NIE and GUI–TONG YANG (4–375)

A further study of the anomalous response of an elastic–plastic structural model to impulsive loading

..... YU XU and TONG–XI YU (4–387)

The effect of the sheet rigidity on strength of the spot weld tension shear joint

..... CHUN–ZHI LI and YUAN–HAN WANG (4–403)

Problems on circular–arc cracks between dissimilar materials under antiplane concentrated forces

..... YOU–WEN LIU (4–417)

Microvoid multistage nucleation model and its application in analyses of micro damage and fracture

..... KE–SHI ZHANG and CHANG–QING ZHENG (4–433)

Boundary element method to solve torsion problem of cracked cylinder

..... REN–JI TANG and WEI–JIANG CHEN (4–447)

Application of finite difference method adopted in fluid mechanics to study propagation in ducts

..... ZHI–ZHI ZHU (4–457)

The boundary element method applied to elastic contact problems with or without friction

..... TONG JIANG and YIAN–JIE XU (4–469)

List of contents 1990 ..... (4–479)
